OUR ASPIRATION IS TO PROTECT INDIAN ENVIRONMENT

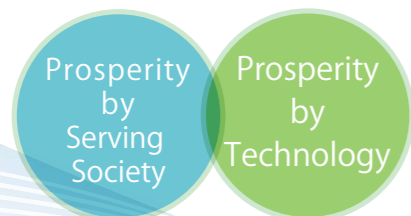

INTRODUCTION

Hiyoshi India Ecological Services Private Limited is a 100% subsidiary company of Hiyoshi Corporation, Japan and was established in the year 2011.

Service Quality is of extreme importance in a Japanese Company and Hiyoshi India strives to provide environmental services with various dimensions of Service Quality such as tangibility, reliability, responsiveness, assurance, and empathy.

At Hiyoshi, we are serious about protecting the environment by delivering true and reliable results as we all have an obligation to protect the Mother Earth and to ensure a safe and clean environment for the future generations.

Hiyoshi India affirms and abides by the principles laid by its parent company that a Company can continue to exist only if it contributes to the society and such service to the society can be achieved only if the Company has the capability and technology.

CONTRIBUTING TO SOCIETY

Based on the concept that “Environmental problems have no national boundaries,” Hiyoshi has raised environmental awareness in India through various CSR programs such as:

- Talk Your Way to Japan - Speech Contest since 1995 to encourage and inspire school and college students to care for the Environment.
- Hiyoshi Awards since 2007 to commemorate and appreciate the Indian scientists/researchers for their innovative, outstanding scientific research and application in the areas of environmental conservation in India.
- Hiyoshi Internship Program since 2007 to provide an opportunity for University/College students in India to work and experience the environmental sector.

Hiyoshi India Ecological Services Private Limited was born as a result of the 25 years of social contribution activities in India and to continue to contribute for the betterment of the environment.

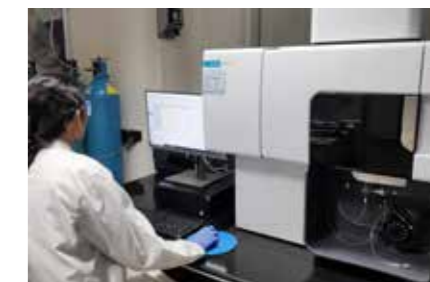

BUSINESS LINE

ENVIRONMENTAL TESTING - WATER & WASTEWATER

Water analysis helps to assess the quality of water, which is very important to know as it has long-lasting health effects. Hiyoshi India undertakes the physical and chemical analysis of water as per national and international standard specifications and provides a complete range of services for organic and inorganic analysis, using classical wet chemistry as well as advanced instrumental analytical techniques.

As water quality analysis plays a vital role in environmental pollution assessments, the collection of high-quality field samples is also a pre-requisite in order to obtain technically accurate results. Hiyoshi India sampling teams are well-trained and fully equipped to provide high quality sampling.

WATER & WASTEWATER TREATMENT PROJECTS

Hiyoshi India provides the best proposal for erection & commissioning, revamping, consulting, operation & maintenance of WTP, STP, ETP, RO, Nano, UF and DM to various sectors such as factories, apartments, star hotels, academic institutions, IT parks, shopping mall, hospitals, and many others. Samples are analysed from various locations like Inlet, Outlet, Aeration Tank, Clarifier, etc. and based on the NABL accredited in-house laboratory results and the onsite instant tests using Japanese pack test, the engineer can confirm the water quality and thus provide efficient treatment.

OUR STRENGTH

- Striving to always enhance our “Service Quality.”
- Japanese expertise support from experienced staff.
- 24 hours water & wastewater treatment facility management support.
- Providing “One-Stop Service” to cater to all the customer requirements from preliminary study of the existing plant, consulting, designing, erection and commissioning to monthly operation and maintenance.
- NABL accredited laboratory for reliable test results.
- Specialized services such as study of microorganisms in aeration tank and JAR test for selection of suitable chemicals and effective dosage for wastewater treatment.
- Onsite instant test using Japanese pack test method and portable water quality analysis meters to identify the operational problems in the STP, etc.
